ABOUT US

globalwealth-analysis.com has been sharing financial freedom with traders since 2014. In a continuous effort to give traders a more comfortable and safe experience, its experts have been improving the platform ensuring traders can enjoy and make use of that freedom to trade whenever and wherever they like.

Our people are our greatest asset - we say it often and with good reason. It is only with the determination and dedication of our people that we can serve our clients, generate long-term value for our shareholders and contribute to the broader public. At every step of our employees careers we invest in them, and ensure their interests remain focused on the long term and closely aligned with those of our clients and shareholders.

CERTIFICATE

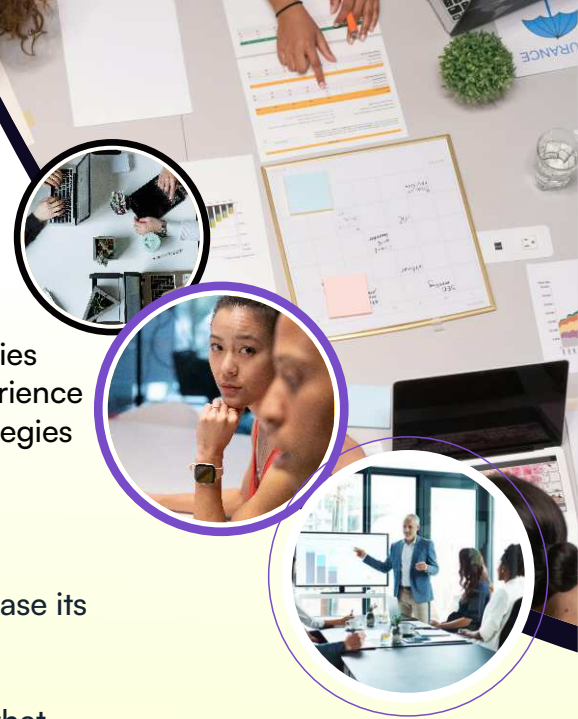

chain-giving us an unparalleled view of the continuous shifts in ESG. We're uniquely positioned to collaborate with clients to drive transparency, insight and impact.

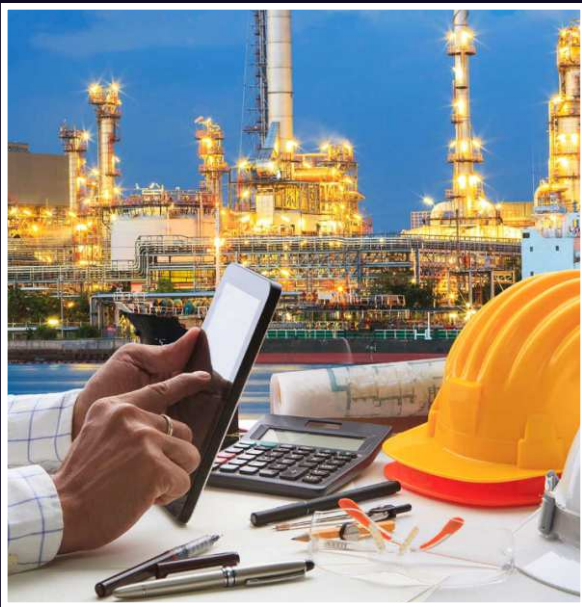

INVESTMENT PHILOSOPHY

We know that the best way to achieve this objective is to be disciplined in our approach, and that we will be more successful when we thoroughly understand a business, its challenges and opportunities. We begin by investing in portfolio's that meet well-defined criteria in industries where we have relevant knowledge. We leverage our accumulated experience and work closely with the managers of our portfolio's to implement strategies to energize our businesses.

KEY TAKEAWAYS

1. An investment involves putting capital to use today in order to increase its value over time.
2. An investment requires putting capital to work, in the form of time, money, effort, etc., in hopes of a greater payoff in the future than what was originally put in.
3. An investment can refer to any medium or mechanism used for generating future income, including bonds, stocks, real estate property, or alternative investments.
4. Investments usually do not come with guarantees of appreciation; it is possible to end up with less money than with what you started.
5. Investments can be diversified to reduce risk, though this may reduce the amount of earning potential.

RISK MANAGEMENT AT THE CENTER

We seek to manage risk in order to capitalize on opportunities and improve our performance. Disciplined risk estimation and management are deeply integrated components of the investment process across each one of our strategies. We believe a well-constructed portfolio upfront will outperform in good markets and protect our client's capital in difficult markets. For this reason, globalwealth-analysis.com has spent over a quarter of a century establishing risk management as a core discipline. This approach begins with a dedicated governance group that oversees risk management. An emphasis on liquid markets, proprietary risk models and a diversified funding structure seeks to further strengthen our approach.

At globalwealth-analysis.com, we advance sustainable economic growth and financial opportunity. Drawing on over eight years of experience working with the world's leading businesses, entrepreneurs, and institutions, we mobilize our people, culture, technologies, and ideas to advance the success of our clients, broaden individual prosperity, and accelerate economic progress for all. Our purpose comes to life through our four core values: Client Service, Excellence, Integrity, and Partnership.

Mirror Trading

All you need to become a trading guru gathered in one place: education, analytics, video lessons, trading tips, market news, and so much more!

Copy Option Trading

Copy trading is a type of trading where you copy the trades performed by another, more experienced trader. It can be manual, semi-automatic or fully automatic.

Advance Trading

The trade entry and exit rules can be based on simple conditions such as a moving average crossover or they can be complicated strategies that require a comprehensive understanding of the programming language specific to the user's trading platform.

Stocks

Swing Trading

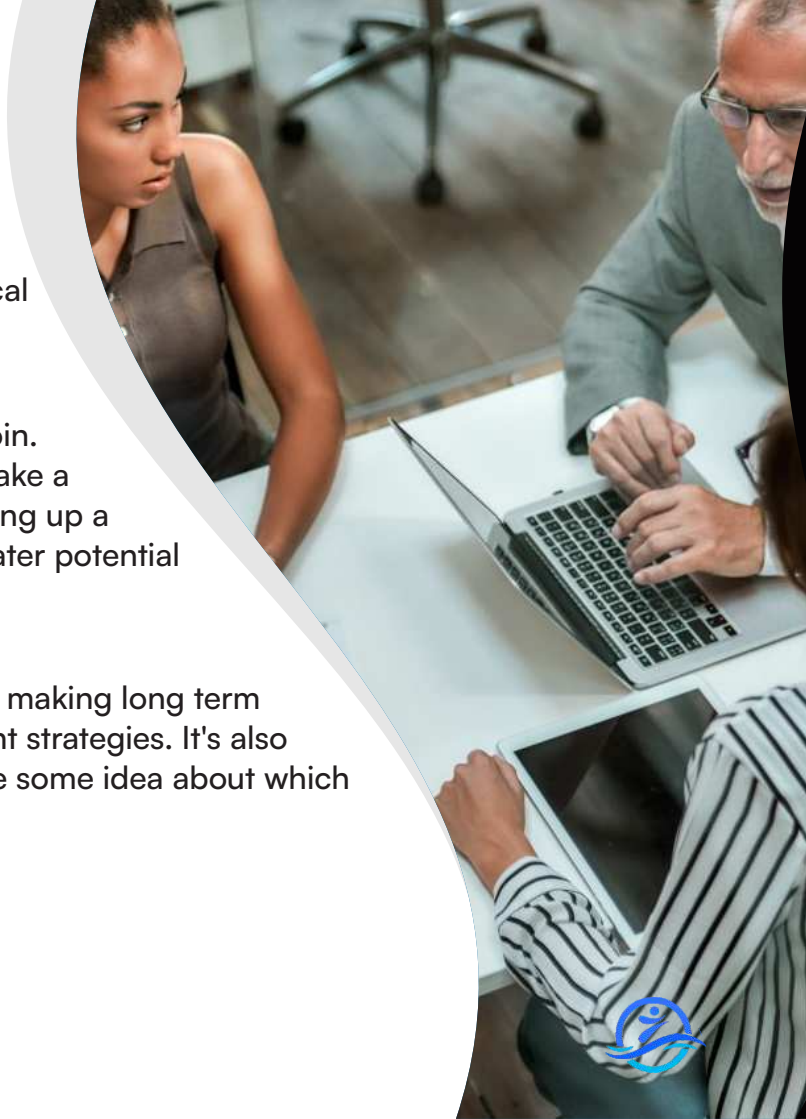

Swing trading is a style of trading that attempts to capture short- to medium-term gains in a stock (or any financial instrument) over a period of a few days to several weeks. Swing traders primarily use technical analysis to look for trading opportunities.

Futures

Futures contracts also exist for bonds and even bitcoin. Some traders like trading futures because they can take a substantial position (the amount invested) while putting up a relatively small amount of cash. That gives them greater potential for leverage than just owning the securities directly.

Options

Buying stocks and holding on to them with a view to making long term gains is after all, one of the more common investment strategies. It's also a perfectly sensible way to invest, providing you have some idea about which stocks

CLEAR INVESTMENT PROCESSES

Our transparent investment processes detail how each investment team identifies and implements investment opportunities and the risk/return profile to be expected. We believe that strict adherence to these guidelines is one of the most effective forms of risk management.

ESG INTEGRATION

As a signatory of the United Nations-supported Principles for Responsible Investment (UN PRI) initiative, we're committed to investing responsibly and supported by a global team of dedicated ESG specialists whose recommendations help shape the investment process.

ROBUST OVERSIGHT

Portfolio risk management is supplemented by our independent risk and quantitative analytics team—which partners with investment teams to measure behavioral biases and other risks but reports to senior investment management—and an operational risk management function that assesses risk across the complex.

HIGH-CONVICTION, RISK-AWARE PORTFOLIOS

Our focus on proprietary, security-level research allows us to build high-conviction, differentiated portfolios. Our risk management processes provide valuable insight to help our teams understand potential outcomes.

Become a Pro Trader

A RELIABLE TRADING PLATFORM IS THE FOUNDATION OF SUCCESS

Every trader wants to profit in the best conditions and doesn't want to fear for the safety of personal funds. The first obvious thing a novice trader does is to study different online trading sites.

The main criteria for a successful internet trading platform are international reputation, unwavering reliability, constant support at all stages, and unique useful trading features. These qualities are combined in the award-winning globalwealth-analysis.com broker and electronic trading platform.
